### **GHSP REACHES MILLION-UNIT MILESTONE IN CHINA** *COMPANY ALSO EXPANDS TESTING FACILITIES AS GROWTH CONTINUES*

Shanghai - With the production of its one-millionth automotive shifter in China this fall GHSP has solidified its competitive position in the China market for [shift systems](#). The company also announced the completion of significant expansion of its shift system testing facility in Shanghai.

GHSP has two wholly owned plants in Shanghai and has been in [China](#) since 2000. The company began manufacturing shifters in China in 2005. The company produces shifters for a range of customers in China including Honda, SGM, Suzuki and BBDC. Products include shifters for both [automatic](#) and [manual](#) transmission vehicles.

A key success factor in GHSP's growth has been the company's investments in product testing facilities located in China to serve the China market. Test facilities in China now mirror the facilities used in GHSP's North American operations, which provides substantial competitive advantages in proving out new products and technologies for China-based customers. GHSP said it has nearly doubled its China test facilities in 2009, and expects to make additional investments in 2010.

The investment GHSP has made in testing capabilities, engineering and technical talent has given the Shanghai operation a world class facility dedicated to shift system testing.

GHSP Shift Systems are in passenger vehicles produced around the world. The systems begin with intelligent design and integrate electronics and styling features that make GHSP shifters the product of choice on many of today's most respected vehicles. GHSP has been proudly serving customers in [North America](#) since 1924 and China since 2000. GHSP has been issued over 70 shifter related patents.

**GHSP**
